Tree Peonies

(Paeonia Arborea)

Generally speaking, the Tree Peony differs from the Chinese Peony, in that the stems of the Tree Peony are woody and the plant will attain a height of over 5 feet.

Upon request of many of our friends we decided to release part of our collection of Tree Peonies and it is a pleasure for us to offer our customers an opportunity to have in their garden specimens of the finest varieties now known of this remarkable plant, the Tree Peony.

Each

| ARCHIDUC LUDOVICO. Enormous wide flower. | Lacii |
|---|-------|
| double, flesh-pink, turning soft lilac. Velvet purple | |
| at the base\$ | 3.00 |
| ATHLETE, Immense double flower of fine glazed | |
| mauve, shaded rose; vigorous and prolific grower. | 4.50 |
| CHROMATELLA,. This striking novelty is a sport | |
| from the beautiful variety "Souvenir de Maxime | |
| Cornu." Color: a pure sulphur yellow without any | |
| shade of salmon or buff. The flower is full double | |
| and very large | 25.00 |
| COMTESSE DE TUDER. Lively salmon, petals tipped | .5.00 |
| sating white; fine full double flower; free bloomer | 5.00 |
| · | 3.00 |
| FRAGRANS MAXIMA PLENA. Double, Salmon | 2.50 |
| flesh-pink, bronzed foliage. Very beautiful | 3.50 |
| JULES PIRLOT. Large globular flower, perfect in | |
| form; satiny pink, flushed carmine | 5.00 |
| LACTEA. Pure white, blotched carmine; fine and | |
| free-bloomer | 3.50 |
| LA LORRAINE. A cross between P. Lutea and a | |
| variety of P. Moutan. Large well expanded full | |
| double flowers of good substance; the petals nearly | |
| imbricated, being of a soft sulphur yellow with a | |
| salmon tinge when opening, becoming lighter and | |
| purer when fully expanded. (Awarded a work of | |
| Art at the Paris Horticultural Exhibition in 1909, | |
| awarded first class silver medal at the Ghent Qui- | |
| quennial Exhibition 1913, first class certificate | |
| from the Floral Committee of the Royal Horticul- | 0.50 |
| tural Society, May 14, 1913) | 2.50 |
| MME DE VATRY. Very large globular bloom; satiny- | |
| , , , | 3.50 |
| REINE ELISABETH. Flower perfect in shape, vivid | |
| salmon-pink. A brilliant color, considered amongst | |
| | 2.25 |
| SOUVENIR DE DUCHER . Large, globular bloom; | |
| bright reddish violet with silvery reflex; | 3.00 |
| SOUVENIR DE MAXIME CORNU. A vigorous | |
| variety, raised by L. Henry at the Paris Museum | |
| from P. Lutea hybridized with P. Moutan Ville de | |
| Saint-Denis. It forms a bush 3-4 feet high with | |
| abundant and healthy foliage, every stem carries 2 | |
| or 3 full flowers, 8 inches or more across, with | |
| crowned and wrinkled petals, of a deep yellow, | |
| heavily shaded orange, fragrant. (A.M.R.H.S.) 1 | 0.00 |
| TRIUMPHE DE VANDERMAELEN. Clear rosy | |
| , , | 3.00 |
| SURPRISE. A tall vigorous variety, flowers carried | |
| by strong stalks, very large and full; the color is | |
| a combination of straw yellow, pale salmon and | |
| | |
| rosy-purple, of a very novel character. Fragrant 2! | 5.00 |

SIZE OF PLANTS: At prices quoted we supply a strong two year-o'd plant. We can also supply one-year plants at 20 per-cent iess.

DELIVERY OF TREE PEONIES: Fall or summer.

The Newest in

French Lilacs

These New Lilacs stand out above other varieties because of their enormous trusses and exquisite new colors.

Although our collection of French Lilacs comprises nearly 100 varieties, the purpose of this list is to bring to your attention the very newest and most interesting developments.

At prices quoted we supply strong $1\frac{1}{2}$ -2 foot plants. If interested in larger sizes of our general collection, please ask for catalog.

| ask for Catalog. | CL |
|--|-----------------|
| CAPITAINE PERRAULT (Lemoine). Immense spikes of large full double flowers of a superb rosymauve, buds of the same color. A magnificent late-flowering variety | Each \$ 2.75 |
| ETNA (Lemoine). Broad panicles of medium-sized regular flowers, deep claret purple, late. Practically the most approaching to red. Double | 3.00 |
| GENERAL PERSHING (Lemoine). Double flowers of a quite unusual size, broad lobes of a rich purplish violet, paler underneath; big purple buds; late. Very beautiful | 5.00 |
| MARECHAL FOCH (Lemoine). The expert Horticulturist Felix Crousse pronounced this to be the handsomest of all single Lilacs. The high panicles, carried by long straight stems, are truly immense and very light. The individual flowers, fully 1 inch in diameter, perfectly shaped, are of a bright carmine rose with a pink eye when opening, contrasting with the mauve of the older flowers and the deep carmine of the buds. Early. A TRULY SENSATIONAL NEW LILAC | |
| MARIE FINON (Lemoine). Large branched panicles, round flowers of the purest alabaster white. Extremely floriferous. Single | |
| MASSENA (Lemoine). Strong upright spikes, individual flowers over 1-inch across, of the deepest pure red. (Award of Merit Royal Horticultural Society) | |
| MONTBLANC (Lemoine). Although not the very newest, we consider this a variety of tremendous interest; enormous trusses of pure white and a plant of unusual qualities | |
| MRS. EDWARD HARDING (Lemoine). This variety was awarded in 1921 the special prize, founded by Mrs. Edward Harding for the best double red lilac. Large panicles of large full flowers of the brightest | , t |
| PAUL DESCHANEL (Lemoine). Immense panicles of very broad flowers, rosy mauve with carmine buds, exceedingly free | |
| PRESIDENT LINCOLN. Seedling from Virginalist Single flowers 3/4-7/8-inch across, purplish lilac in in bud, wedge-wood blue when fully open, large clusters. Branches ascending and habit somewhat compact. Very vigorous and early in bloom | 1 2 |
| PRESIDENT ROOSEVELT. Seedling from Aline Mocquery. Single flowers 3/4-7/8-inch across. Deep purple red in bud, bright purplish red when fully open. Flowers somewhat cup shaped. Clusters 9 inches long. Branching habit, open and vigorous | ; ; ; |
| | |

French Tree Lilacs

We can supply several varieties of French Lilacs in treeform. These plants have 3-foot tall self-supporting stems and 3 year heads. You will find them listed in our general price list.

Syringa Microphylla

A remarkable new shrub, introduced from China. Graceful slender stems; pinkish-red buds opening to pale pink, loose panicles, small individual florets. The flowers produce a two-tone effect that is very pleasing and novel. The main truss is on top of each stem and smaller trusses are set down the branches, so that the entire plant forms one large bouquet. The foliage is very pretty; about 1 inch long and ¾ inch wide. Often_blooms again in the fall2-3-foot plants, \$1.50 each.

Japanese Rose-flowering Cherries

NOTE: One dozen plants at the price of ten.

Visitors are always surprised to find at our establishment one of the largest stocks of Japanese Flowering Cherries grown in this country. First it was considered foolish to grow this type of material as far north as we are. However, as the years went by we were able to demonstrate that our Japanese Cherries are extremely hardy and there is no reason why they can not be planted, with entire satisfaction, in any garden in the middle west. Our stock, which is grown from the ground up in the open fields, without protection, can be completely depended upon. The varieties we offer are the finest we have found this far.

NEW RED, a fine deep rose, double. Similar to Sekizan, late. ROSEA FLORE PLENA, double rose pink, very free. HISAKURA, glorious deep apple-blossom pink. Late. SHIROFUGEN, large double flowers of soft pink, large clusters. Early.

| | E | Each |
|-------------|--|------|
| Prices of ; | 2-3 foot plants\$ | 1.25 |
| Jap. Flow. | 2-3 foot plants\$ Standard Form 3-4 foot plants | 1.50 |
| Cherries) | 5-7 foot plants | |

Caragana Lorbergii

A very striking form of Caragana that is rarely seen. The plant is of great interest because the texture of the foliage is different from any other shrub and thus is ideal for contrast. The plant is perfectly hardy and thrives in sun or semi-shade. Bright yellow blossoms in early spring.

| 2-3 foot. | \$0.50 | each | \$5.00 | per | dozen |
|-----------|--------|------|--------|-----|-------|
| 3-4 foot. | | each | 7.50 | per | dozen |

Hardy Golden Chain Tree

This plant develops into a 20-foot tree and produces in spring an abundance of light yellow blossoms in slender racemes, 10-12 inches long, like Wisteria. This tree is much hardier and has longer blossoms than the ordinary golden chain. 3 foot plants, \$1.00 each. \$10.00 per dozen.

Lemoine's New Hybrid Philadelphus

Not enough can be said about the great strides Mr. Lemoine has made in the development of the Philadelphus. From the old type Mock-orange have developed hybrids with flowers 3 inches across, some full double and blooming not only in the spring but again during the summmer. Our general price list lists 24 varieties but, to answer the purpose of this special list, we are mentioning some of the most outstanding and newest ones:

Each AMALTHEA. Vigorous plant with lustrous leaves and large flowers, slightly blotched pale pink, $2\frac{1}{2}$ -3 foot plants...... 1.00 **ATLAS.** A handsome tall growing sort with enormous flowers, over $2\frac{1}{2}$ inches wide, broad petals milk-white. (A.M.R.H.S.) $2\frac{1}{2}$ foot 1.50 **BOUQUET BLANC.** Double white flowers, set in thick clusters, 2-3 foot..... .50 GLACIER. Double flowers, clustered by six or seven in thick panicles, milk white, 2-3 feet..... .60 FAVORITE. Large single flowers, 3 inches across, pure white with attractive yellow stamens, an extremely graceful plant, 4-5 feet. .75 VIRGINAL. This is by far the finest white-flowering shrub in existence. The flowers are double, of perfect form and the color is of the finest pure white imaginable. In spring the plant produces an abundance of flowers in immense clusters of a most delightful fragrance. Then again during the summer it blooms from time to time. We do not know of a more meritorious shrub. .45 3-4 feet....... .55 .70 4-5 feet.......

5-6 feet......

One Dozen Plants at the price of Ten

1.00

Unusual Flowering Crab Apples

"At the other side of the garden is another Crab Apple, spreading its branches above a group of delicately flushed Tulips—that rise from a waving sea of Forget-Me-Nots. All my Crab Apple Trees have been attendant gatherings of Tulips . . ." Louise Beebe Wilder in "Colour in my Garden" . . .

To many garden enthusiasts almost all Flowering Crabs are unusual, and they are. Malus Atrosanguinea is a gorgeous flowering Crab, it has been known for many years and still, if you see this marvelous plant in full bloom in some friend's garden, you will say "how unusual", how different than the ordinary run of plants. But, we are issueing this list to call your attention to the very latest in hardy ornamentals, and therefore we took out of our list of over 25 varieties of Crabs, those that are most unusual.

| Please remember that you can obtain lovely effects combination of Flowering Crabs and Tulips. | by the Each |
|---|------------------------------|
| BREVIPES. Early in May this plant is covered with an abundance of pink buds that later turn pure white; the individual flowers are 3/4-1 inch across. The plant grows compact and the foliage is a pleasing light green, narrow and pointed. 2-3 feet | \$1.00 |
| MICROMALUS (Midget Crab). Grows upright, blooms very early and free. An abundance of rosyred buds, edged silvery pink, in clusters of five. The inside of the flowers are silvery pink. The plant grows to about 10 feet and the fruit is a yellowish- | 4.50 |
| red. 3-4 feet | 1.50 |
| PRUNIFOLIA RINK! (Chinese Apple). Large white flowers, red-yellow fruit. Keeps its foliage way | |
| into winter. 3-4 feet | 1.50 |
| ROBUSTA PERSICIFOLIA. Grows to 12 feet. Blooms very early. The flowers have a pleasing fragrance, are pure white with soft yellow stamens. Dull red fruit. 3-4 feet | 1.25 |
| ELEYI. Among all the newer plants, we do not know of a more beautiful and more unusual addition than Malus Eleyi. The young foliage is a rich deep mahogany red, changing to rich reddish green and again changing in fall to orange and scarlet. The form of the tree lends itself to landscape design, as it is graceful and pleasing. The flowers are single in small bunches, each flower about $1\frac{1}{2}$ inches across of a pleasing vinous red, that harmonizes extremely well with the color of the foliage. Can be supplied in all sizes. | |
| 3-4 feet | 1.00 1.75 3.00 1.75 |

For a complete list of Flowering Crab Apples, please see our 1933 Price List.

RAISE OF PRICES: If your order reaches us promptly you protect yourself against any sudden raise of prices which present subnormal conditions may bring about.

Viburnum Carlesi

(Fragrant Viburnum).

Of this Viburnum, Mr. Ernest Wilson said: "This is a real aristocrat. For the small garden, where there is room for only the choicest shrubs, the one Viburnum above all others that should be grown, is VIBURNUM CARLESI." It blooms for Mothers' day and clear through the Tulip Season. The flowers are deliciously fragrant, opening light pink and developing into Bouvardia-like umbels of pure white. The shrub grows 4 feet high and 5 feet wide. The plant does equally well in semi-shade or full sun. It likes a well-drained soil and plenty of moisture during the growing season. Viburnums in general do **not** like manure.

Japanese Peonies

"Had I but four square feet of ground at my disposal, I would plant a peony in the center and proceed to worship" From "Paeonies in the Little Garden"—By Mrs. Ed. Harding.

Nothing can be more lovely in the spring landscape than a planting of Japanese Peonies. The colors and forms are delightful; there is a grace to the Japanese Peony that has not yet been approached by any other flower. Japanese Peonies in general still belong to the unusual things in the garden but we have many years ago foreseen the sensation they would create and have built up an excellent collection of this type of Peony. The country's foremost landscape architects are more and more realizing the possibilities for magnificent effects by the use of Japanese Peonies.

General List of Cottage Gardens Modern Double Peonies (Paeonia Chinensis)

SIZE OF ROOTS: We send out strong divisions with from three to five eyes and adequate Root System, Standard of the American Peony Society, from healthy plants not over three years old, grown on soil that has no been used for Peony Culture before.

We grow Peonies for their ROOTS ONLY; our efforts are directed entirely toward production of excellent Roots.

Although we do not recommend the planting of undivided clumps, we will gladly furnish such in two year and three year old, respectively at twice and three times the price of Standard divisions.

What the ratings before the varities mean:

9.5 or more, almost perfect. 9.0 very fine 8.5 fine 8.0 very good. 7.5 good
